

Flashing Systems

Flashing systems are divided into two categories:

Base Flashings – A continuation of the membrane, turned up and on a different plane from the field of the roof.

Base Flashing types:

- Hypalon
- TRA Elastomeric
- Modified Bitumen

Counterflashings – Typically metal that shields the exposed edges of the base flashing.

Flashing Systems Overview

Hypalon Elastomeric Sheeting is a reinforced flashing membrane used with Tremline or TremLock fascia. It can be used on cold built-up, hot built-up, modified bitumen or single ply roofing systems.

TRA Elastomeric Sheeting is a proprietary blend of EPDM (ethylene propylene diene monomer) and SBR (styrene butadiene rubber) elastomers that is reinforced with a high strength polyester woven scrim.

POWERply Modified Bitumen Flashings are reinforced with either a high strength composite scrim or a polyester scrim.

Features	Benefits	Hypalon	TRA	MB
• Compatible	• Used with a variety of Tremco & other systems including asphalt-based materials.	X	X	X
• Polyester reinforced	• Provides flexibility & durability for high stress applications.	X	X	X
• Hot applied in a polymer modified asphalt	• Efficient/labor saving application method.		X	X
• Cold applied	• Versatile application	X	X	X

Flashing Systems

Hypalon Elastomeric Flashing Systems

FLASHING MEMBRANE
Hypalon Elastomeric Sheeting
(available in a variety of widths)

ADHESIVES
Black Sheeting Bond
White Sheeting Bond
PolyRoof SF

ACCESSORY ITEMS
PolyRoof LV
BURmesh
Tremply Lap Adhesive
TremSeal S

TRA Elastomeric Flashing Systems

FLASHING MEMBRANE
TRA Elastomeric Sheeting
(available in a variety of widths)

HOT APPLIED ADHESIVES
THERMastic Adhesive
THERMastic 50 Adhesive
POWERply Hot Melt Adhesive

COLD APPLIED ADHESIVES
Black Sheeting Bond
PolyRoof SF

ACCESSORY ITEMS
PolyRoof LV
BURmesh

Modified Bitumen Flashing Systems

FLASHING MEMBRANE
POWERply Standard FR
POWERply Premium FR
POWERply Premium Smooth
POWERply HE FR
POWERply Supreme Smooth
POWERply HT FR
POWERply Extreme Smooth
POWERply Extreme FR

HOT ADHESIVES
THERMastic
THERMastic 50
POWERply Hot Melt Adhesive
Premium IV Asphalt

COLD ADHESIVES
ELS
Brush Grade Flashing Mastic
Sheeting Bond
PolyRoof SF

ACCESSORY ITEMS
PolyRoof LV
BURmesh

MISCELLANEOUS ITEMS
TremFlash TF Tape

FLASHING SURFACING
Double Duty Aluminum
PolarCote FR
One Coat Aluminum
High Build Reflective Coating
Factory Applied Mineral Surfacing

Counterflashings

TremLine Fascia
TremLock Coping
TremLock Fascia
TremLock Surface-Mounted Counterflashing
