

CERTIFIED FABRICATED

PVC ACCESSORIES

VERSIFLEX

A ready reference guide for ordering PVC Accessories for your next job.

Molded Sealant Pockets

PVC molded sealant pockets are adjustable, interlocking, two-piece, injection-molded flexible pockets that are used to waterproof pipe clusters or other oddly shaped penetrations.

Split Pipe Seals

PVC Split Pipe Seals are fabricated flashings made of 60-mil reinforced membrane. An overlap tab allows the Split Pipe Seal to be opened and wrapped around a pipe with an obstruction.

Pipe Seals

PVC Pipe Seals are injection-molded, pre-formed flashings for pipes 3/4" to 8". Clamping rings included.

Inside Corners

Inside Corners are pre-molded and are used for flashing the inside corners on a variety of details. Installation is fast and easy with no cutting or stretching required.

Outside Corners

Outside Corners are pre-molded and are used for flashing outside corners. Installation is fast and easy with no cutting or stretching involved.

T-Joint Covers

PVC T-Joint Covers are used to seal step-offs at splice intersections. Installation is mandatory on all 60- and 80-mil PVC systems and on 50-mil systems where step-offs have not been properly sealed.

Square Tubing Wraps

PVC Square Tubing Wraps are fabricated flashings made of 60-mil reinforced membrane and are designed to flash square metal tubing.

All VersiFlex PVC accessories come with a Certified Fabricated Accessory (CFA) stamp of approval. This signifies that it meets the stringent quality requirements to be labeled as a Versico product and included on warranted projects.
